OTE 82-1029

22 March 1982

MEMORANDUM FOR: DDO/Senior Training Officer

FROM: 

25X1

Deputy Director of Training and Education

SUBJECT: CTTC and Emergency Destruction Training--  
Post Operations Course Training*Jerry*

1. Reference is made to your 10 March 1982 memorandum concerning the above subjects.

2. While it is possible to include elements of the CTTC in the post OC training program, we consider it unwise to do so. The reason is that weapons familiarization, defensive driving, and residential security are best offered as close to the time the student goes abroad as possible. In the case of most OC students, at least 18-24 months will elapse between the end of their post OC training and arrival on station. We believe the student will have lost much in the way of skill and familiarization over an 18-24 month time span if the training is included as part of the post OC program.

3. As for the emergency destruction of files, this is being included in the special six week  Ideally, this subject should also be addressed as close to the departure for overseas as possible but the four hour block of instruction required is, in our judgment, too much to take out of an already full OC and CTTC schedule.
